Manage and Control Digital Signage

With digital signage, you can display information, images and animation in an eye-catching way that will captivate and intrigue your customers to increase brand awareness and sales.

Manage signage from your smartphone

Free App

Creating a digital signage display or video wall can be a time-consuming and confusing process. **The Video Switching and Wall Control App** provides you with an easy-to-use interface to set up, control, and customize digital signage solutions. It automatically adjusts and configures content according to the setup, and enables you to control and change the content to create your ideal solution.

Designed to work with our HDMI over IP Distribution Kit

Set up a video wall with ease

You can put together a complete digital signage setup with this **HDMI® Over IP Distribution Kit**. These products work together to send HDMI audio/video signals over a network, to up to 100 displays. You can configure and control the video wall with our **mobile app**.

ST12MHDLAN & ST12MHDLANRX

HDBT™

HDBaseT is a standardized, zero latency, video distribution technology that's revolutionizing HDMI distribution.

Our **HDBaseT Extenders** are perfect for extending HDMI signals from one source to one display. They can support the astonishing picture quality of 4K, which is four times the resolution of high-definition 1080p, at up to 100m.

ST121HDBTE 70m
ST121HDBTPW 100m  Ultra HD 4K

HDBaseT uses an advanced method of modulation that enables you to distribute uncompressed HDMI audio and video, along with additional signals such as 100BaseT Ethernet, IR, RS-232 serial and power over cable.
